Angus Frost

Experience

Burger Consulting Group — *December 2005 to present*

Joined Burger Consulting as a Senior IT Consultant and was named Managing Director in 2009. Involved with clients on IT organizational and infrastructure planning and management. Also supporting other consultants with software selections and implementations from a technical perspective. Significant role in build-out of Burger Consulting knowledge base and support systems.

Bridger — *April 2004 to November 2005*

Chief Technology Officer for a management and technology consulting firm, a subsidiary of Wight & Company. Aside from CTO duties, responsible for helping clients establish the direction of their information systems and infrastructure to support their core business. Involved in research and development of both new systems and new business service offerings. Facilitated strategic and business planning engagements for clients.

Wight & Company — *March 2001 to April 2004*

Chief Information Officer/Chief Technology Officer for one of Chicago's largest architecture firms. Responsible for management of all information systems-related projects. This included system selections including but not limited to ERP, CRM, Document Management, and Portals; strategic planning; system evaluations; and implementation planning. P&L level responsibility.

Spencer Stuart — *August 1995 to March 2001*

Information Specialist providing research and development support and systems architecture design to a top-five worldwide executive search firm headquartered in Chicago. Reporting to the Chief Technology Officer and the Vice President of Information Systems, coordinated the efforts of both groups in systems development and infrastructure design. Facilitated worldwide systems requirements analysis, including ERP and Document Management. Provided support in developing training methodology and materials for new systems rollout.

Reuters — *January 1992 to August 1992*

Data Analyst for an information systems group. Responsible for analyzing data across multiple systems. Member of a security clearance team responsible for particularly sensitive data management.
