Experience

Burger Consulting Group — 2009 to present

Joined Burger Consulting as a Senior Consultant with 15+ years experience managing and supporting ERP software implementations exclusive to the construction industry. Providing clients with software implementation project management. Also supporting other consultants with software selections from a product and vendor analysis perspective.

J.D. Edwards/PeopleSoft/Oracle — December 1993 to September 2008

Consulting Practice Manager, responsible for developing Staff and Specialist level consultants focused on the implementation of PeopleSoft, Oracle, and J.D. Edwards Financial, Project Management and Supply Chain application suites. Also provided operational oversight to Staff Augmentation projects. Earlier positions include Install Base Project Manager, directing internal and external business partner resources to meet project objectives and ensure an on-time/on-budget completion, and working exclusively in the Architectural, Construction and Engineering vertical, providing application expertise and leadership to assist clients in achieving business objectives. Responsible for managing project teams, developing and maintaining project plans, status reporting and providing solutions based on client needs and industry best practices.

Computer Guidance Corporation – January 1988 – December 1993

Senior Consultant responsible for the implementation of all Financial, Job Cost, Supply Chain, Equipment Maintenance and Payroll/HR applications exclusively for the construction industry. Clients included Construction Management, General Contractors, Heavy, Industrial and Subcontractors throughout the U.S. ranging in size from \$1M to \$600M. Conducted client training, supported installed client base as a member of the Support Team, assisted in development of Implementation Planning Workbooks and conducted Post Implementation Audits.

Fails Management Institute (FMI) – November 1983 – January 1988

Senior Consultant exclusive to construction industry clients, providing assistance with Financial and Job Cost systems selection and implementation. Responsibilities included conducting process audits, analyzing paper flow, managing documentation and personnel. Developed client Process and Procedures Manuals and assisted with development of standardized tools to assist clients in the selection of Job Cost, Financial, Estimating and Scheduling software.
